

Flexible Automation Plaza

Have you ever been promised a “solution” to your automation problems...only to be disappointed and left with a bunch of automation components that don’t work together properly. It happens more than you may think.

At Braas Company we take a different approach. We have created an environment designed to give you confidence when choosing automation technology...we call it our “Flexible Automation Plaza.” Braas Company invites our clients to visit our Flexible Automation Plaza to actually experience and learn about leading edge automation technology before they buy. Our clients routinely use our facility to do pre-sale proof of concept, time trials, program development, machine simulation for troubleshooting and ROI calculations. The Flexible Automation Plaza is specifically designed to help Braas Company work with our clients to prove their application concept before they buy anything so that they can be assured they will get a true automation solution that will fit their needs.

Experience the broad range of technology the Braas Company has to offer:

- Robotics
- Vision
- PLC's
- HMI's
- Wireless Communications
- Multilayered Networking
- Ethernet
- DeviceNet
- SCADA Software
- RFID
- Machine Control
- Safety
- Material Handling
- Servo / Stepper Multi-Axis Controls
- Vision Guided Motion

Ask your salesman today to schedule a tour of the Flexible Automation Plaza.
