

# Experience the Future. Now.

## Exclusive Invitation

be among the very first to see the U.S. debut of Omron Industrial Automation's new Machine Automation Controller (MAC), the newest state-of-the-art integration of motion, vision and logic. This comprehensive Omron automation solution will demonstrate high-performance machine cell control, production line incorporation, and facility enterprise connectivity. Our Solution Partners will be on hand to provide you with complete, turnkey automation solutions.

## Keynote Address from Tom Fink

*Founder and Senior Consultant, Lean Manufacturing Fink Lean Operations*

Learn applicable lean solutions that can benefit your business from one of the founding members of Honda America's Lean Network.

### Tom Fink

led Honda America's Lean Manufacturing initiative, working with 60+ Tier One suppliers. He spent 21 years at Honda in the Purchasing Supplier Development Group. His experience, enthusiasm and insights make him one of the premier speakers on Lean Manufacturing in North America. His presentations are dynamic, educational and inspiring.

**You won't want to miss this!**
